Education

Kansas State University December 2016 Grad	Study computer science. Work in a team. Learn many programming languages, pattens, and techniques. Favorite courses include Game Engine Design, Concurrent Software Systems, and Computer Architecture. 3.1 Overall GPA

Experience

KSU Webteam Sept. 2013 – May 2016	Developed internet applications for KSU. Worked on an agile team. I was responsible for training new employees in Django and python.
Network Development Group May 2016 – Present	An internship using Django and python to create interactive learning tools.
dgitprompt	Built with D, C, and libgit. Displays git information in a shell independent manner for your prompt. Licensed under MIT license. github.com/aaronschif/dgitprompt
Eagle Scout	Participated in community projects. Learned leadership and teamwork.
4th place 2015 ACM programming contest	Worked with my team to prove our programming abilities. Competed to complete the most programming brain teasers with the fewest mistakes in the allotted time.
